HENDERSON / MLK WAY CSO PROJECT

January 13, 2003

Work to relocate utilities along S Norfolk St from MLK Way South west to 40th Avenue South is nearing completion.

King County would like to thank each of the many businesses and individuals on S. Norfolk and 40th Ave S for their patience during this important phase of work on the Henderson / MLK Way CSO Project.

Upcoming Work

Week of January 13

Crews will finish filling in the open trench along Norfolk and re-grade the north shoulder of the road. For about two weeks there will be less work along Norfolk although heavy trucks and earth-moving equipment will still use the road to transport materials. Flaggers will direct traffic as needed and motorists are asked to continue using caution in the area.

Week of January 27

Seattle City Light will begin installing a large, underground electrical service on Norfolk that will lead to the project's tunnel outlet regulator. City Light crews will impact traffic along S Norfolk St for this work. This work is estimated to take about five weeks.

Mid-February

Construction will begin in mid-February on an access driveway from S Norfolk St to Nelson Trucking. During this time, additional drilling will also occur along with excavation of two holes near the Nelson property line at 40th Ave S.

Update on South Norfolk Street Sewer Improvements

Work on S Norfolk St is part of the two-and-a-half-year King County Henderson / MLK Way CSO Project, which will help eliminate overflows to Lake Washington and improve the sewer system in the Rainer Beach Community.

This work extends along a two-mile alignment from Seward Park Avenue South and South Henderson Street to 42nd Ave S. The alignment continues under 42nd Ave S to S Norfolk St and then to East Marginal Way South west of I-5.

Spring 2003

A 72-inch sewer line will be installed from 42nd Ave S west along Norfolk and private property to I-5. Work on this open-trenched pipeline is expected to take approximately one month.

**HENDERSON / MLK WAY
CSO PROJECT
CONSTRUCTION NOTICE**

The King County Wastewater Treatment Division will continue working on South Norfolk Street at 40th Avenue South in 2003.

This work is part of a major project to help eliminate storm and wastewater overflows to Lake Washington, adding capacity and improving the sewer system in the Rainier Beach Community.
